Top opportunity in the United States /
North America with prospects for the future!

konvekta

Our customer, KONVEKTA AG is market and technology leader in the field of high-performance energy recovery systems. Resourceful engineers work every day with passion and conviction on new innovative solutions and are a major contributor to improving energy efficiency and reducing CO₂ emissions. For further expansion of the subsidiary in the United States we are looking for a cosmopolitan, customer-oriented and energy-savings enthusiastic

Engineer for the division service and after-sales USA

Tasks: During the first months you are thoroughly prepared at the headquarters in St. Gallen for your future tasks. Then you work out of your residence in North America. When moving to United States, you will be supported by our team in America. Your challenging future tasks include:

- Perform factory acceptance tests and system commissioning at customer sites
- Scheduling and expediting with customers and suppliers
- First-level customer/team support for technical questions and malfunctions
- Spare parts management
- Establish a service organization
- Participate in the continued expansion of the company in a fast-growing market
- Travel 50 - 80%

Requirements: Ideally you have completed an engineering degree in the field of HVAC, building technology or electrical and controls technology and have several years of experience in an international environment of a technical service business. You communicate fluently in German and English and have very good computer skills. You are independent, reliable and with integrity, have extremely high self-motivating skills and are ready to enter a long-term task. Take advantage of this unique opportunity and send us your CV!
